

Athletic Recovery Center Marketing Plan

ARC Cary has invested \$140,000 into its recovery center with monthly operational costs of \$7,000, aiming to capture the Raleigh-Durham market.

ARC faces challenges in market segmentation, competitive pricing, and breaking even within 12 months amidst stiff competition.

How can ARC effectively segment its market, optimize pricing strategies, and implement promotional tactics to achieve sustainable growth?

Summary of Recommendations and Rationale:

1. Segmentation, Targeting and Positioning for Core Services and Hyperbaric Therapy

Recommendations:

- Core Services:
 - Segmentation: Target fitness enthusiasts, athletes, and wellness-focused individuals who value cost-effective and efficient recovery solutions.
 - Targeting: Focus on mid-tier to premium income groups seeking affordable recovery with flexibility.
 - Positioning: Emphasize faster recovery times, affordability, and convenience through tiered pricing and loyalty plans.
- Hyperbaric Therapy:
 - Segmentation: Patients with chronic conditions, post-surgical recovery needs, and premium wellness seekers.
 - Targeting: High-income groups and individuals prioritizing long-term health benefits.
 - Positioning: Market as a scientifically proven solution offering accelerated healing and premium therapy.

Rationale:

- Core Services addresses the pain points of affordability and accessibility for fitness-conscious users, increasing engagement and retention.
- Hyperbaric Therapy's positioning as a premium offering caters to a niche yet high-value segment, ensuring revenue from fewer but higher-paying customers.

2. Pricing Strategy

Recommendations - We recommend adding single sessions for both Core Services and Hyperbaric Therapy. And, slightly increase the pricing for Hyperbaric therapy.

- Core Services Pricing:
 - Single sessions (\$25/session) - provides flexibility for casual users.
 - Basic Plan (\$75/4 sessions) - encourages recurring usage at an affordable rate.
 - Standard Plan (\$165/10 sessions) - offers value for bulk purchases, promoting consistency.
 - Unlimited Plan (\$300/month) targets committed users with high frequency.
- Hyperbaric Therapy Pricing:
 - Single sessions (\$150/session) cater to occasional users.
 - Pack of 5 sessions (\$675/5 sessions) balances affordability and accessibility.
 - Pack of 10 sessions (\$1,200/10 sessions) provides better value for regular users.

Rationale:

- This helps attract users seeking flexibility or to try the services before committing. This aligns with competitor practices and improves accessibility.
- For Hyperbaric Therapy, slight price increases based on the competitive landscape and national average to \$75 for the 5-session pack and \$200 for the 10-session pack to boost revenue while staying competitive, reflecting the premium value without deterring customers.

3. Promotion Strategy

To position ARC Cary as a leader in recovery and wellness, we propose an integrated promotion strategy focusing on digital marketing, diverse channels, complementary solutions, and customer engagement to enhance visibility, build trust, and foster community connections.

3.1 - Digital Strategy

- Enhance SEO to rank for relevant keywords.
- Use Google Ads and Social Media Ads to target fitness enthusiasts.

Rationale: Competitors like Restore Hyper Wellness dominate digital channels. Strengthening ARC's online presence ensures visibility and leads.

3.2 - Channels

- Partner with Insurance Providers to make HBOT more accessible.
- Collaborate with Corporate Wellness Programs targeting local businesses and sports teams.
- List services on Groupon/Yelp to attract budget-conscious customers.

Rationale: Competitors use these channels effectively. Adding them ensures ARC captures untapped segments.

3.3 - Complementary Solutions

- Build referral partnerships with Doctors, Chiropractors, and Mental Health Therapists to drive trust and credibility.

Rationale: Trusted referrals generate word-of-mouth marketing and establish ARC as a credible wellness destination.

3.4 - Customer Engagement

- Launch informational newsletters with wellness tips, inspired by Arnold Schwarzenegger's Pump Club's successful model.
- Host pop-ups at fitness events to educate customers about ARC's services.
- Foster a community through group events and exclusive offers.

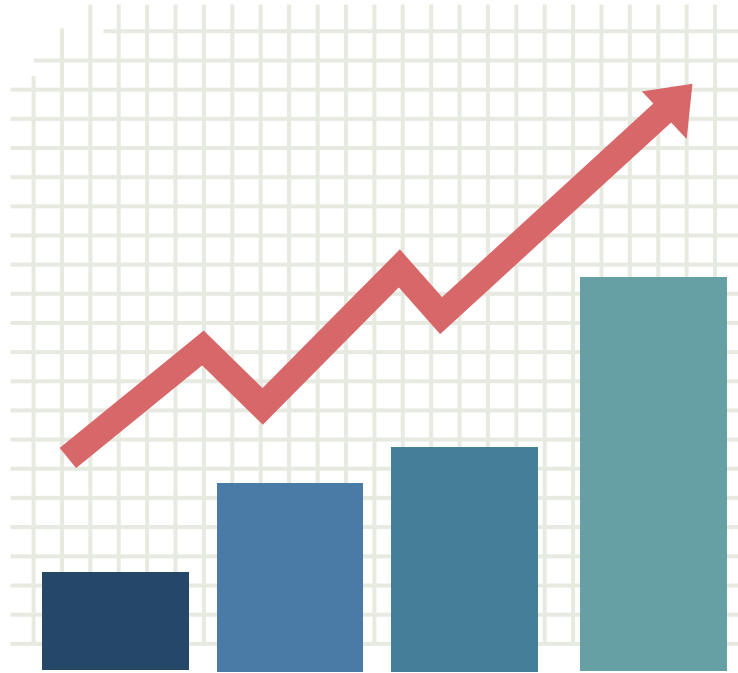

4. Break-Even Analysis

Recommendations:

- Key Metrics:
 - Initial Investment: \$140,000.
 - Fixed Costs: \$7,000/month.
 - Net Revenue per Customer: \$130 (post 60% variable costs to BuckedUp + GM).
 - Required Monthly Revenue: \$18,667.
- Break-Even Target:
 - Attract 144 customers per month generating \$18,667 in total revenue.

Rationale:

- We used a top-down approach to calculate the minimum number of customers needed monthly to break even, offering a clear revenue target to cover fixed costs and recover the initial investment within 12 months.
- This method avoids assumptions about current customer numbers, ensuring realistic and goal-oriented planning for pricing, promotions, and customer acquisition strategies.
- Achieving break-even within 12 months ensures financial stability, supports steady customer growth, and positions ARC for sustainable expansion.

Athletic Recovery Center Marketing Plan

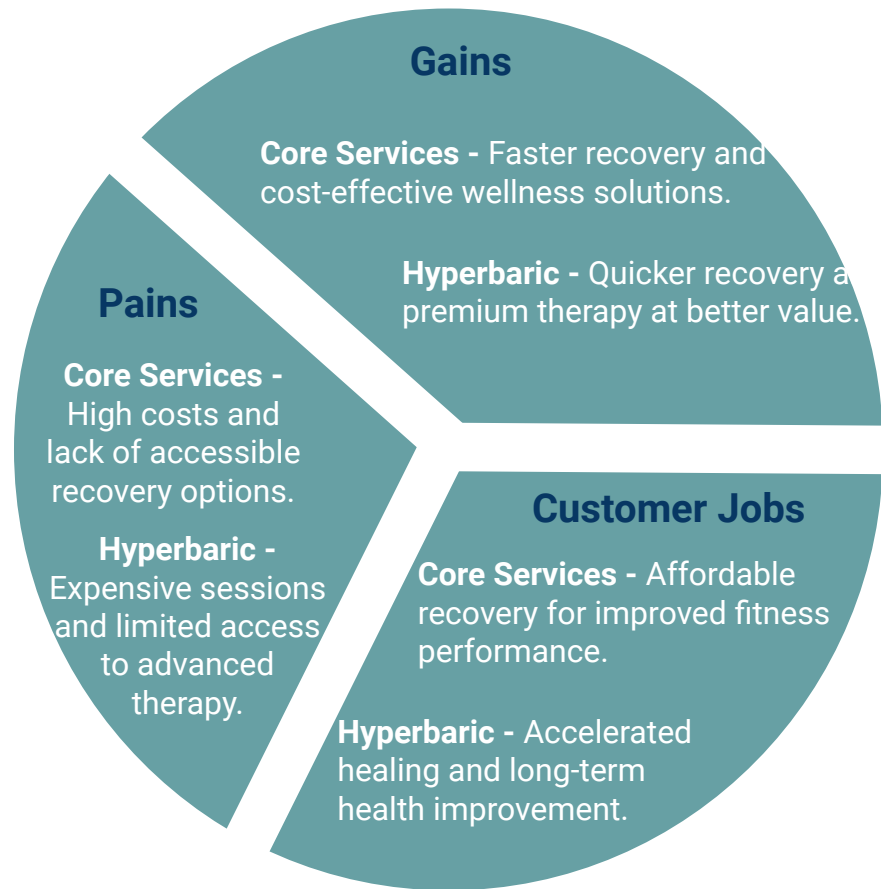

Team 7

Value Map

Customer Profile

Pricing Strategy

	Core Services	Hyperbaric
Single Session	\$25 / session	\$150 / session
Basic Plan	\$75 / 4 sessions (30 days expiry)	-
Standard Plan	\$165 / 10 sessions (3 months contract)	\$675 / 5 sessions (30 days expiry)
Elite Plan	\$300 / Unlimited sessions per month	\$1200 / 10 sessions (45 days expiry)
Bundle Pack	\$200 per month (4 core sessions + 1 hyperbaric session)	

Rationale / Considerations

01

Flexibility - options catering to occasional users who don't want to make a commitment.

02

Affordability - entry-level options encouraging regular usage.

03

Balance - choices offering value through bulk discounts to drive consistent engagement.

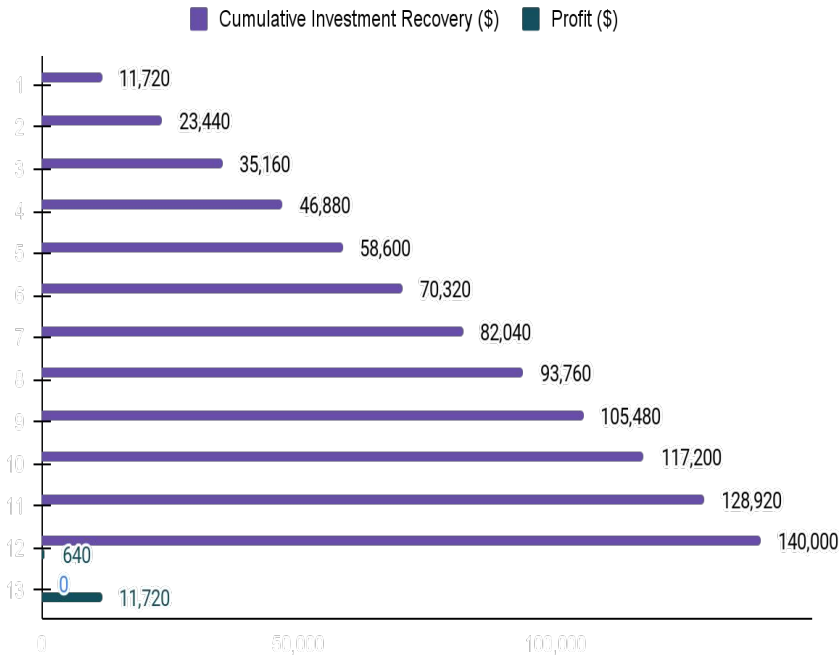

04

Bundles - targeting wellness focused users, combining core and hyperbaric services for holistic health benefits.

Break-Even Analysis

To achieve break-even in 12 months, ARC requires at least 144 customers generating \$18,667 monthly revenue.

Metric	Value
Initial Investment	\$140,000
Fixed Costs (Monthly)	\$7,000
Average Revenue/Customer	\$325
Break-Even Time	12 months
Customers Needed per Month	144

Promotion Strategy

Digital Marketing

Inbound Marketing - Search Engine Optimization, Influencer marketing, Podcast mentions.

Outbound Marketing - Social Media & Google ads, Email Marketing.

Quick wins:

1. Email Databases - Lusha or ZoomInfo
2. Free CRM and Appointment System by Biobarica

Channels

Insurance Providers - customers prefer insurance for HBOT due to it's high cost.

B2B - partner with Corporate Wellness programs and local sports teams.

Online Marketplaces - List services on sites like Groupon, Yelp, etc. to increase brand awareness.

Complementary Solutions

Doctors - establish revenue-shared referral partnerships with Orthopedic and Dermatologists for HBOT and Red Light Therapy.

Chiropractors - partner for revenue-shared referral partnerships for sports injuries and post-surgical recovery.

Mental Health Therapists - collaborate to complement stress & anxiety treatments, positioning as alternatives to Yoga Studios, Meditation Centers.

Customer Engagement and Awareness

Informational Newsletters - create engaging newsletters, like "Pump Club," to drive customer interaction beyond direct selling.

Pop-ups - set up booths at local health and fitness events for brand visibility.

ARC Community - build a community through group events and offer exclusive offers for ongoing engagement.

Are We About To Reverse The Obesity Trend?

Research suggests that for the first time in more than 60 years, obesity in the United States has decreased.

Fitness

Work Your Legs, Heal Your Back

When your body hurts, it seems natural to take a load off and rest. But that's not necessarily the best approach to feel better.

A new analysis found that **improving the range of motion in your hamstrings** — with stretching or exercise — can help you bounce back faster and relieve lower back pain.

Scientists analyzed 14 studies on people who suffered from chronic back pain. They found that improving hamstring mobility — even with something as simple as stretching — could take the edge off of pain and improve function in patients with lower back issues.

Hamstring stretching reduces muscle tightness and improves mobility in the lower back and pelvis, thereby reducing strain on the lower back (the lumbar spine) and decreasing pain.

Several studies found that stretching two or three times per week led to a clinically significant improvement in as little as three weeks. The researchers found that holding a hamstring stretch for 10 to 40 seconds and doing five sets
